

GOLD DASHBOARD PRO v5.4

MetaTrader 5 Expert Advisor • XAUUSD Scalper • Dual Engine (AI + Algorithm)

About the Bot

Gold Dashboard Pro is an MT5 Expert Advisor that scalps gold (XAUUSD) on short timeframes. It runs two signal engines at the same time: an indicator-based algorithm (RSI, Stochastic, EMA 9/21, MA 20/50 and an EMA 200 trend filter) and an optional OpenAI-based engine (falls back to a simulated AI when no API key is set). In the default EITHER_AGREE mode, either engine can open a trade, and trades are strongest when both agree. v5.4 adds a Profit Mode that stacks small extra trades while the day and the open trades are in profit.

1. General

Property	Value	Notes
Version	5.40	Gold Dashboard Pro v5.4
Platform	MetaTrader 5	Expert Advisor (.mq5), uses Trade\Trade.mqh
Symbol	XAUUSD (gold)	Runs on the chart symbol
Magic number	20251002	Identifies this EA's trades
Engine mode	EITHER_AGREE	Other modes: AI_ONLY, ALGO_ONLY, EITHER_HIGH_CONF, BOTH_MUST_AGREE
Max base positions	1	Up to 3 extra in Profit Mode
Entry check interval	1 second	Checked on every tick, throttled to 1s

2. Indicators

Property	Value	Notes
EMA 1 (fast)	9	Cross and trend alignment
EMA 2 (slow)	21	Cross and trend alignment
EMA 3 (trend filter)	200	BUY only above it, SELL only below it
MA fast / slow	20 / 50	EMA-mode trend alignment score
RSI period	14	Buy zone below 40, sell zone above 60
Stochastic	5 / 3 / 3	Cross signals under 35 (buy) and over 65 (sell)
ATR period	14	Displayed on the dashboard

3. Risk and Exits

Property	Value	Notes
Stop loss	40 pips	+5 pips per spread tier above NORMAL
Take profit	60 pips	Allowed range 40 to 60 pips; set on the order
Pip definition	1 pip = 1 point	Input InpPointsPerPip; set 10 for a \$0.10 gold pip
Lot sizing	0.01 per \$30	Balance / 30 x 0.01, minimum 0.01
Max lot cap	0.20	Upper limit for the balance-based lot
Max daily loss	10%	Trading stops for the day
Max daily profit	20%	Trading stops for the day
Break-even	20 pips (+5 offset)	Moves SL to entry plus offset
Trailing stop	25 pips, step 5	Starts after 25 pips of profit

Property	Value	Notes
Max trade age	30 minutes	Auto-closes older trades; set 0 to disable

4. Profit Mode (small trades while in profit)

Property	Value	Notes
Activation	Day P/L above 0	And last trade won, or all open trades are in profit
Extra positions	up to 3	On top of the 1 base position
Extra trade lot	0.01	Fixed small lot for each extra trade
Gap between trades	3 seconds	Normally 5 seconds
Direction rule	Same as open trade	Extra trades never hedge
Add condition	All open in profit	No new extra trade while any is losing

5. Spread-Adaptive Rules (points)

Property	Value	Notes
NORMAL	up to 25	Lot x1.0, SL 40, TP 60
ELEVATED	26 to 35	Lot x0.70, SL 45, TP 60, min score +1
HIGH	36 to 45	Lot x0.50, SL 50, TP 60, min score +1
EXTREME	46 to 50	Lot x0.30, SL 55, TP 60, min score +2
Blocked	above 50	No new trades
Min profit vs spread	1.0x	Pip TP exit must cover at least 1x spread cost

6. Signal Logic

Property	Value	Notes
Algo min score	2	RSI reversal +2, EMA cross +2, Stoch cross +2, trends +1 each, EMA200 +1, momentum +1
Bias fallback	ON	RSI zone plus EMA alignment can fire below min score
AI model	gpt-4o-mini	Updates every 30 seconds
AI min confidence	0.45	Used in EITHER_AGREE mode
AI key	Input (empty)	Empty key = simulated AI. Use a new key, never share it
Opposite-signal close	ON	Closes a trade when the AI flips

7. Protection and Sessions

Property	Value	Notes
Cooldown after loss	15 seconds	Pause after each losing trade
Max consecutive losses	3	Then pause for 2 minutes
Session 1	02:00 to 08:00	Server time
Session 2	14:00 to 22:00	Server time
Pause / Resume button	On chart	Manual start/stop of new entries

Important Notes

- Test on a demo account first. No settings can guarantee profit, and scalping results depend heavily on broker spread.
- With 1 pip = 1 point, a 60 pip TP is only a \$0.60 move on 0.01 lot, so a 25 to 30 point spread takes a large share. Consider InpPointsPerPip = 10.

- Profit Mode adds exposure. A sharp reversal can hit several stop losses together, so keep the extra positions low at first.
- Allow WebRequest for <https://api.openai.com> in MT5 options if you use the real AI engine.
- Keep your API key private. Revoke any key that has been pasted in a chat or shared file.
